The Content-Aware Move Tool is a bit like the Clone Stamp tool. It is useful for repairing photos by replacing damaged or missing areas with the surrounding regions. The Gradient Tool is used for customizing the lighting and color of various areas in an image. The Pen Tool is a very versatile tool that can be used for drawing with a wide variety of effects. The Blur Tool allows you to apply a Gaussian blur to your pictures. You can also choose to apply a partial or total blur to your images, which is a useful feature to create the illusion of shallow depth of field. The Lasso Tool is used for adding and removing small sections of an image with a polygon. The Lasso tool can be set to "freehand" mode, which allows you to draw without a polygon. The Gradient Overlay tool allows you to apply a gradient overlay to your image. You can do this on a slide-by-slide basis or create a looping animation. The Pencil Tool allows you to simulate drawing on an illustration with a brush or pen. The Pencil tool can be used to add simple lines, dashes, and dots to your picture. The Eraser Tool is used to erase any part of an image that you want to remove. The Eraser Tool is great for erasing unwanted objects or correcting mistakes. The Watercolor Tool is useful for adding detailed, watercolor-like textures to your images. The Paint Bucket Tool is used for filling areas with a color. You can use it to apply preset colors, or you can adjust the color and opacity of the fill on a slide-by-slide basis. You can also use the color picker to apply colors in a large range of colors and values. The Gradient Mesh Tool allows you to apply different color textures to different parts of an image. The Gradient Map tool allows you to apply different color and transparency values to different parts of an image. The Air Brush Tool is used to create fine paint effects for retouching your pictures. The Air Brush Tool can be used to create realistic effects such as metallic or antique effects, or you can create more abstract, expressive effects. You can also use the tool to apply matte paintings to your images. The Color Replacement tool allows you to swap out the colors in specific areas of an image with new colors. It is useful for correcting images that are too dark or too bright. The Healing Brush tool is used for

The 15-year-old girl was abducted in Opole district of central Poland. The image of the girl on the toilet was also published on Facebook by the police. Let's hope that her captors didn't make the mistake of showing any more of their handiwork on Facebook. Translated from Polish police have published disturbing images on their website of 15-year-old girl, who has been kidnapped in the country's central region. The teenager, who is from Opole, was abducted on September 24 by three unidentified people and forcibly taken to an unknown location. She was forced to take a shower and told to put on the underwear she was wearing, before being taken to the bus station. They took her to her hometown, where they broke into the house where her parents live. Police have released a photo of the girl on the toilet and said they are searching for "her kidnappers". The girl was wearing a bra and underwear when she was abducted. According to Daily Mail, her parents received a call just before 8 pm local time in which the kidnappers told them they had her. The police then requested people upload the images on the site just published. This is not the first time that the police use graphic images in their hunt for the kidnappers, as in July they publicly released images of a 4-year-old girl in a bid to find her father, who is thought to have been involved in the murder of a man. The father, was found by the police and taken into custody. He is accused of murdering the child's mother, who also died.Q: How to auto-close a window when its modeless form has lost focus? I have a console window that contains a form. The window is modeless and its window style is None. When the console window is focussed, I want the form to be auto-closed as soon as its modeless form loses focus. How can I do this? Thanks A: Check out this CodeProject article on catching Window.LostFocus() in a console application. You could use the same technique to catch the lost focus event for your console window. For completeness, this is how you add an event handler: public MyForm_GotFocus(object sender, EventArgs e) { ... } And you can remove the event handler
