This program seems to work with AMD hardware and not NVIDIA hardware. I had AMD hardware when I bought the program then switched to NVIDIA hardware and now the program no longer works. You can see in the pixel-me steam forum that people have correlated NIVIDIA and this program not working. This program is useful and I wish I could have used it more but alas, I can not.. This program seems to work with AMD hardware and not NVIDIA hardware. I had AMD hardware when I bought the program then switched to NVIDIA hardware and now the program no longer works. You can see in the pixel-me steam forum that people have correlated NIVIDIA and this program not working. This program is useful and I wish I could have used it more but alas, I can not.. This program seems to work with AMD hardware and not NVIDIA hardware. I had AMD hardware when I bought the program then switched to NVIDIA hardware and now the program no longer works.
